Community Engagement Frontier

Applications and Industry subtopic

Subject: Letter of intent to participate in Snowmass Collaboration

To Whom It May Concern:

I have been on both sides of the research spectrum. With more than 10 years of my career spent at Brookhaven National Laboratory and the last 10 years for profit R&D and product development, I've been interested in the Particle Physics Community Planning Exercise. The interest comes from the fact that at Field Viewers we have brought technologies from the DOE labs to market and find this model very impactful on various fields, including Medical, Industrial and Security markets. I intend to participate in these activities as an industry collaborator and help out in writing a white paper for Applications and Industry Frontier.

I look forward to attending and organizing future meetings at Snowmass,

Sincerely,

Sachin S Junnarkar, Ph.D
